ANNEXATION TO CANADA.

Several Large Industrial Interests Favor It.

CHICAGO, May 9.—A special from Washington says there is again some agitation on the question of annexing Canada to the United States. It is reported that influential and wealthy Canadians are favoring the proposition, while the great bulk of the manufacturing, mechanical and laborers are working for annexation. A manufacturer at Ontario, has written a letter here in which he says: "We are nearly all annexationists, and we believe our future prosperity depends upon speedy admission into the American Union. We are greatly dissatisfied with our present position as a British dependency. We have no representatives in the Imperial Parliament, and as a part of the American Union we would be beyond danger of attack whenever England becomes involved, and besides our rights as a colony would be a part of a great nation with a voice in its affairs. There is an annexation in this country, all over Canada, which is for the purpose of promoting the growth of a movement for annexation. We intend to agitate the question till we succeed. The French-speaking class of our people are for annexation. The only people who oppose us are the would-be aristocracy and those that call themselves the court circle. By the next general election in the States we want to be ready to ask you to take us into the American Union."

HUNTINGTON.

The prices of lots in beautiful Huntington will be advanced next Monday from 20 to 30 per cent, owing to the rapid sale of lots and great success of the enterprise, and the fact that prices are now one-third those paid for lots in less desirable locations.

An immense supply of water is now being piped through the streets and avenues, and several residences and stores are to be erected at once, the first store to be stocked with boots and shoes. There is an excellent opening for a drug store. A few more choice lots left at old prices, this week only, at offices of Wiesendanger & Boushall and S. D. Hovey, 22 First street, and at all the leading Pasadena real estate offices.

A Burglar Confesses.

Messrs. H. M. Shank and Charles Stephens, proprietors of a livery stable left on Saturday last for San Diego and returned yesterday. When they went to their rooms they found that some one had broken into them and stolen numerous articles of wearing apparel and other goods including a revolver. Both gentlemen started out on a hunt for the thief, whom they soon located and placed under arrest. He proved to be Stephen Conroy, and when captured he was so frightened that he confessed and told where all of the stolen goods were to be found except the revolver. They turned Conroy over to Officer Bonini and a charge of burglary was placed against the prisoner at the Police station.

Sole a Gun.

John Powell, who was employed by Mr. Ward at the Cerritos ranch, was recently discharged. Powell, after receiving his discharge, went back to Mr. Ward's house and took a valuable double-barreled shotgun and brought it to this city. Mr. Ward was stopping, and on searching the room, found the gun. Mr. Ward arrested Powell himself and charged him with grand larceny at the police station.

HYDE PARK!

LOOK WHERE YOU WILL IN THE VICINITY OF THE CITY OF LOS ANGELES! search either of lots or acre property for charming homes, and the best judgments will be convinced at a glance as to the difficulty of finding a location for a town so beautiful, such pure and bracing air, and smooth, rich lands as characterizes Hyde Park. This splendid townsite is located on the line of the California Central, of the Atchison, Topeka and Santa Fe system, which is to connect Los Angeles with the new harbor at La Bolla, and is distant 7 1/2 miles from the center of the city; a midway town between the city and the harbor. Trains are to be running through the tract by July next, when business activity all along the line will be the order of the day. Liberal sized lots, 60x150 feet, fronting on 60-foot avenues, are offered and being taken rapidly at \$100 each; \$50 cash; balance \$50 per month without interest. Such terms give the present purchasers a good opportunity to make money in the rising values that must follow the effects of the harbor and railroad developments. Particularly desirable are the 5 and 10 acre villa lots surrounding the town. Conveyances leave the office at 1:30 P. M. to show parties the beautiful property.

There is just being finished on this property a magnificent Bank Block, costing \$20,000, and the "Ontario National Bank" will commence business therein in the course of a few weeks. Three brick, plate-glass-fronted stores are also about ready for occupancy, and the contracts are let for a number of others.

The Steel Rails for an Electric Railway to the mountains, and cast-iron pipes for an efficient Water System are now on the ground.

Prices have been placed very low, and large profits on small investments are assured.

The right is reserved of allotting any two lots in any of above blocks previous to day of sale, for immediate improvements.

Remember that this is not a paper town. Improvements that

the other new towns expect to have in the course of years are here. The settlement is here to support business, and brick blocks are going to accommodate it. The radius of country tributary to South Ontario is large and thickly settled by a well-to-do and prosperous people such as will amply support a large and thriving town.

Dwellings are already promised for all parts of the tract as soon as the lots can be obtained, and provision for a fine Presbyterian church has been made.

To enlarge upon the marvelous beauties and productiveness of Ontario would be a work of supererogation, so well is the model colony known—not only in California, but throughout the entire United States. Euclid Avenue, which runs through the center of the tract now offered for sale, is admittedly the most famous avenue, not only in America but in the world.

This is no new town, in a raw and unsettled district, but is adjoining some of the finest improvements in the valley, and is to be the Business Town of the "Model Colony" of the world.

OPINIONS OF ONTARIO, FROM PROMINENT PUBLIC MEN AND WELL-KNOWN NEWSPAPERS:

"Ontario, the beautiful and altogether lovely—this Eden of beauty."—[Hardy (Nebraska) Herald.]

"During the past winter I spent three months in traveling over Southern California and I have no hesitation in saying that Ontario is the most desirable, the most beautiful and the most promising colony that I visited in all my travels."—[Senator Easley, of Auburn, Indiana.]

"Better water privileges or better land cannot be found in California."—[Montreal Witness.]

"With an unsurpassed location, with excellent educational facilities, with ten passenger trains a day, and with whisky abominably ruled out, it is entitled to be called the model colony of the world."—[Rev. Dr. Compton, Colusa, Cal.]

"Ontario, I believe, has no equal as a health resort."—[Dr. C. R. Sykes.]

"Ontario is, without a doubt, the best planned, the most progressive and promising settlement in Southern California."—[University Catalogue.]

"Of all her cities and towns, San Bernardino has the most reason to be proud of Ontario."—[San Bernardino Courier.]

"Ontario will undoubtedly be able to keep its place at the head of the class."—[Rural Californian.]

"Ontario must constantly increase in importance."—[Los Angeles Herald.]

"Ontario's star is in the ascendant, and it promises to rise higher

and shine brighter as the years go by."—[Weekly Record.]

"Ontario is the prettiest among the many beautiful gems of San Bernardino valley."

"Wherever the Golden State has been heard of, there the fame of Ontario, the model colony, has penetrated."

"All admit that Euclid Avenue is without a peer, either in this country or any other, and will, in a very short time, be the most celebrated driveway in the world."

"Ontario is marching along from its own inherent worth, simply because it is what it is—one of the most beautiful, productive and prosperous places in this semi-tropic land."

"Ontario has made a greater relative growth in population and improvements the past year than any other town in San Bernardino county."—[Los Angeles Express.]

"From the north the snow-capped peak of San Antonio looks down upon this Elysian retreat."

"The water here supplied for domestic use is pure, clear and sparkling, and brought from the cool grottoes of the snow-capped mountains."

"California can produce no finer raisins than those that were grown and cured at Ontario last season."

"With the aid of its equable temperature and the abundance of water, its rich soil produces superior oranges, lemons, grapes and semitropical fruits of all kinds."—[Los Angeles Herald.]

"For health, comfort, enjoyment and profit in citrus culture combined, Ontario, the gem of the mountains, is without a peer."

"Ontario is undoubtedly at the present time one of the very best points in the entire State for investments."

"Her attractions are such as draw with irresistible force, the moral, the intelligent, the educated and the refined."—[Los Angeles Times.]

"Ontario is as pretty as a picture."

"A park of eight or ten acres, with handsome walks and drives, cypress hedges, trees and flowers and fountains, is the first thing one sees when he steps off the train."

"The town has an exceptionally bright future."

"An electric railway is to be built at once from the Southern Pacific depot to the San Antonio Heights. The superb water pressure affords cheap motive power for the electric railway, and electric lights throughout the colony will come along with the railway, the arc for streets, and the incandescent for indoor lights."

"This favored and model—in fact, ideal colony."

"Here, at Ontario, then, we find on this New Year's day, 1887, a settlement of cultured and intelligent people with a college, schools, public libraries and churches, but no saloons; a settlement which is rapidly growing, and in which \$100,000 was expended in building last year; a settlement which has passed beyond the experimental stage, and is now an assured success."—[Los Angeles Tribune.]

ELECTRIC ROAD.

"The rails have arrived for the electric road, and are being unloaded."—[Ontario Record, April 20th.]

WATER PIPE.

Two car-loads of cast-iron pipe have arrived, and fifteen more are the way from St. Louis. This is designed by the Land Company for San Antonio Heights and for the town below the Southern Pacific. The pipe is of the best and heaviest character, ranging in size from six to twelve inches, and has all been tested to 500 pounds pressure. The first shipment will make about four miles. The company has ordered fifteen cars more of wrought-iron pipe ordered—3, 4, and 6-inch; for the smaller lines. We believe this is the largest shipment of pipe yet made from the East to any point in Southern California, and indicates that Ontario is at the front in improvement.—[Ontario Record, April 20.]

SUGGEST THE WHOLE OUTFIT.

solicited by a lady; she would not
him go until he bought something.
looked at her stall, which contained
of various kinds. "Why,"
said, "I see nothing here that would
of the least use to me, a lacholier,
a thick coating of powder to keep it
to me at any price."
"I will be cheap enough," she said
singly.
"If you could be dear enough, per-
haps, to come, you are just the person I
am," taking him by the arm.

He sold him one article after another,
spending an agreeable conversation
while, and before all was done he
had purchased everything on the stand.
at settling up, there was some-
thing said about discount. "I can not
take any money," she said, blushing,
but if you think me dear enough,
and mamma, she may give you my
word, the bargain was accordingly
concluded.

WANTED A MATE.
A skipper of a coasting vessel called
the village inn and asked the land-
lady, a young widow: "Do you know
where I can get a mate? I have lost my
mate."
"I am sorry for you, Mr. M—,"
said she, smiling. "I want a man, too,
and cannot get one. As we are in the
same position, I'll tell you what I'll
do: you'll be mine, I'll be yours." He
floored with the bargain, and the widow
keeping to her word, he is now supplied
with two mates.

MUST BE A WIFE.
This was ingenious enough, like the
case of the theatrical manager who was
brought to the point when he called to
inform his leading actress that he had
secured a play at last which was sure to
have a long run.
"What have you reserved for me?"
she asked.
"You are to be a charming sweetheart
as you are."
"Is there a wife in the play?"
"There is."
"Then I have charming sweethearts
till I am tired. I must be a wife in the
long run." And she was.

BROUGHT HER A HUSBAND.
"Are you married yet, Kitty?" said a
sailor on meeting an old acquaintance
after returning from a long voyage.
"No; that somebody has never come."
"Ah, then, I have brought him after a
deal of bother," said he, throwing his
arms around her, and the matter was
there and then settled.

THE FOLLIES OF BEAUTY.

A Lecture for Belles who Discard
Sense in Dressing.

With the very latest notes on fashion
before me, and my pen suspended, my
eyes fell upon an article which lay upon
my desk, entitled "Gossip About Pretty
Girls."

It gives the modus operandi of
making one's self beautiful, and goes on
to tell how a ruddy blonde of Washing-
ton factors her fat little hands to the
headboard on retiring, so as to reduce
the supply of blood and produce the
delicate complexion of an invalid friend.

To allow the mouth to be open in
sleep is simply outrageous, so as to
assure an avoidance many a
dainty miss wears Morpheus with her
lower jaw and head closely bound with
a skate strap. A narrow pillow placed
vertically under the back and between
the shoulders encourages a perfect statu-
re, so the good old bolster is consigned
to the corner of retired belles and
beaux. Regarding the fair, fresh skin,
classical mold and every law of propor-
tion, and in deference to an arbitrary
fashion which cannot but prove fatal to
beauty and health, our wasp-waisted
belles claim that necessity is the mother
of sin.

A mask of moist rye flour or coat-
ing of cold cream is as regularly assumed
as the night robe, and the feminine head
drooped pillow-ward minus out-paper or
leads is exceptional. Hot foot-baths are
a regular feature of the toilet, as they
tend to draw the blood from hands and
face.

Every girl knows the value of
beauty, and seeks to make herself as
attractive as possible, and should strive
to preserve all attractive qualities; but
artificial devices only can conceal the
ravages of time and dissipation. Still,
"without true regard to the laws of
health, even the powder box, rouge
pallet and pencil prove a shallow re-
source. The maid with a spirituelle
coat of features and complexion clogs the
pores of her fair skin with paint, while
the vigorous, plump, rosy beauty tor-
tures her digestive apparatus with acids
and chills. Each persists in possessing
attributes foreign to her constitution."

To my mind all fresh young faces are
beautiful, and where neatness of person
and order in dress are preserved with
the natural graces given to the maiden
there is no occasion for the "paint and
powder" rage which prevail among our
daughters. They begin the use of cos-
metics so early in life that before they
are middle-aged the skin is ruined and
in many cases so yellow that it takes
a thick coating of powder to keep it
from showing through.—[Brooklyn

Cure for Piles.
PILES are frequently preceded by a sense
of weight in the back, loins and lower part
of the abdomen, causing the patient to sup-
pose he has some affection of the kidneys or
neighboring organs. At times, symptoms
of indigestion are present, flatulence, un-
easiness of the stomach, etc. A molar
like perspiration, producing a very dis-
agreeable itching, after getting warm, is a
common attendant. Blind, bleeding and
itching piles fall at once to the application
of Dr. Ross's Pile Remedy, which acts
directly upon the parts affected, absorbs the
tumors, allaying the intense itching,
and effecting a permanent cure. Price 50c.

time are but indications of the sluggish ac-
tion of the blood, overloaded with carbon-
aceous accumulations by the use of heating
food in winter. This condition may be
remedied by the use of Ayer's Sarsaparilla,
the best blood purifier known.

Distress After Eating.
This result of indigestion will no longer
be experienced if Simon's Liver Regula-
tor is taken after each meal. It is such a
good digester and so mild and pleasant in
its effect that it is used by many after a
heavy meal, to insure good digestion. The
regulator does once and completely rid the
stomach, bowels, and assists the food
stomach in its digestion.

difficulty, and they will be found effective as
well as pleasant to the taste of women and

DAILY HERALD.

SAN BERNARDINO.

How the Development of the Country Progresses.

ROOM FOR MORE SETTLERS.

A Land of Sunny Skies, Fertile Soil, Abundant Water, Fruits, Flowers and Cereals.

On a recent day a Los Angeles banker, a real estate agent and a HERALD reporter took the early train on the California Central system and swiftly sped away through the San Gabriel Valley passing new towns every few miles until Colton, the Indianapolis of the Pacific Coast and San Bernardino of ancient memory was reached. The wheat and barley fields were of a living green, and the roadsides were decked with flowers of a thousand hues. Orchards presented an appearance pleasing to the sense in their brand new livery of bright foliage and snowy blossoms; and the vineyards spread wide over the landscape with a rich promise of a large vintage.

At San Bernardino the train was exchanged for the less modern, but far more poetic means of transit, a couple of pair of horses and carriages. In this wise the town of San Bernardino was traversed from center to periphery, and at every point were encountered the most unmistakable signs of progress and prosperity. One could not escape the conclusion, as he saw brick stores and fine residences on every side, and many new ones in course of construction, that had Henry George but remained on this coast and become a citizen of South California he would never have written his book, "Progress and Poverty." There never had been room for so gloomy an alliteration about San Bernardino.

As one looked at the water flowing from hundreds of great artesian wells; as he beheld the modest cottage literally enveloped in superb roses, or the more pretentious home of the richer neighbor, around whose house flourished magnificent and rich foliage; and then as the eye caught the great arrow on the mountain side, the reflection was inevitable that Brigham Young's words were perfectly, which with his pretended vision he sent forth, his colony into "the land of the midday sun, where in a fertile land, under smiling skies, and amid wells of living water, God should fix an arrow on the mountain side to point out the place of their abode."

Getting out of the city westward the road led still further in the same direction, trending upwards towards the base of the great mountains.

ROOM FOR SETTLERS.

Dwellers hereabouts are aware that people who do not know the resources and possibilities of this region doubt the probability of keeping up the present current of prosperity at the head of development going on for the past half decade.

"How are all these people to make a living?" these doubting Thomases ask. After getting to a proper point of observation one of the new enterprises of the country lay plain to view before the party. Here was the broad and convincing answer to all such doubts.

Where the driver drew rein was near the base line and a mile or two west of the San Bernardino Meridian. Here, in the sight of the intersection of the two lines, forming the pivotal point round which all the surveys of Southern California revolve, stretching wide on all sides lie 20,000 acres of land, nearly all of it level as a table, and the least smooth of it arable to the westward plowman ever guided a team. This tract lies nine miles along the line of the Southern Pacific, and as great a stretch along the new line of the California Central Railway. It runs at from four to six miles in width, and lies between the base of the mountain and Riverside. To give a better idea of the location it may be mentioned that an avenue has been laid out here some seven miles in length, and which stretches straight from the mouth of Lytle Creek Canon, which lies west of El Cajon Pass, where the California Central railroad system, better known as the Atlantic and Pacific, cuts over the divide into the valley, to Riverside, forming a junction with the far-famed Magnolia avenue of that town. Where this avenue intersects the new line of railroad is laid out the town site of Rialto. Be- low, on the line of the Southern Pacific, will be founded North Riverside. The land is subdivided into blocks of twenty acres each. A little arithmetical calculation will convince the most skeptical that the limit of development is far from reached yet. Here is room for 1500 homes outside the town site. That would average 7500 souls as ratios usually run. Allowing 500 homes, or one-third the surrounding country for the town of Rialto, gives 2500 people, or a total population of 10,000 being provided for at this point.

WHAT WILL THEY LIVE ON?

If any one stood upon a like stretch of prairie land in the west and asked such a question he would be laughed at as a lunatic. No region of the west can furnish an area at all comparable to this. Some of those who do not know its worth sneer at us as selling land at \$25 an acre and climate at \$250 an acre. The climate is better worth the money than the land is. But taking the land and leaving out all consideration of the climate and it would be foolish to ask how people are to live on it. Most of this is wild land never tamed by the plow. But here and there are patches already subdued to the uses of civilized man. As this party sat drinking deep draughts of the purest mountain air, and feasting their eyes on the loveliest of landscapes, here and there appeared a field of barley fall in head, which waved like a sea of emerald in the gentle breeze. Elsewhere were fields of alfalfa knee deep to the grazing cattle, and orchards brightly luxuriant and fruitful of the orange, lemon, English walnut, apricot and many other kinds of fruit. Vineyards were visited on this tract whose promise of fruit is simple marvellous. Vine after vine is to be found where as many as fifty bunches hang on the single plant. Old vineyards are the sign of civilization to men that whole area had such a crop been seen. Every useful fruit, vegetable and cereal will grow to perfection here. This vast plain needs only the hoe and the plow and the intelligent enterprise of civilization to make it a veritable garden and enrich the dweller upon it beyond his greatest expectations.

THE WATER SUPPLY.

Water is of prime importance in Southern California. In Spain it is estimated that one acre of land with water to irrigate is worth fifteen acres without water. The price of water in the State is heretofore valued at \$1000 to \$1500 an inch on the land.

Over the lands in question flow great streams in all directions. In rills of large volume it bubbles among wild

flowers along the road-sides. In brook-lets it dances and leaps down the slopes, breaking great boulders in its path, but everywhere insuring fertility to the soil. Space is lacking to tell of the avenue 150 feet wide, of the broad streets between each ten acre plat, of the stream of nearly, or quite 1000 inches of water that runs clear as crystal and cold as ice down Lytle creek canon; of the plans to pipe this to each block of land; of the fertile character of the soil, a decomposed granite mixed with abundant vegetable mould, wrought from the mountains brow and grown and decomposed along its sides in all the countless ages of the material world. Quite enough has been said to show that there is still abundant room in Southern California to furnish the choicest and richest of homes to innumerable people of intelligence and industry. No one can see this land and longer doubt that San Bernardino is destined to become a great and rich county, with a teeming population of most prosperous and happy people. There are but three or four families on this land to-day. In one year after it is put upon the market by the Semi-Tropic Land and Water company there will be 500 new homes founded. Five years from now there will nestle here under the protecting sentinels of the valley—that trinity of great peaks, San Antonio, San Geronimo and San Jacinto, with their venerable heads white with the frosts of some of the hands—10,000 of the happiest and most prosperous people in the world; and each acre of this land will be worth at least \$1000.

FINANCE AND TRADE.

A Review of the Day's Transactions.

NEW YORK, May 9.—The stock market to-day was dull and featureless, a variety of causes, including an inexplicable bank panic, existing is still remaining in regard to the effect of the Interstate law, and the election of Sick Exchange officers, which occurred to-day, contributed to this effect. The fluctuations are unusually narrow for a dull day. London was a moderate buyer early to-day. The sensation was furnished by a drop of something over 1 percent, in Fort Worth and Denver, only a small portion of which was recovered to- ward the close, by settlement with "shorts" and a pool in the strike is believed to have disbanded. Wheeling and Lake Erie was also remarkably weak. Reduction in sterling exchange was an element, the opening of which was steady at first, being unchanged, or only insignificant fractions from Saturday's figures. The general market was about steady until noon, after which it became firm, although it flattened somewhat by a drop in Fort Worth, which occurred at that time. There was a steady though slight appreciation in values toward the close, and the market closed but firm. A majority of stock and small fractions are higher since this evening, but Fort Worth and Denver is down 1/8. Wheeling and Lake Erie 1/2, and Rock Island 1/2 per cent. Government and State bonds were dull and steady to-day.

DAILY HERALD.

CITY COUNCIL.

Removal of Railroad Tracks from Alameda Street.

HEALTH OFFICER'S REPORT.

Bids for Paving Main and Spring Streets Opened—Sewer Bonds for Sale.

The City Council met yesterday afternoon. President Bred in the chair, and Messrs. Stearns, Frankfield, Kohrs, Goss, Lovell, Collins, Myers, Jones, Teed, Perry and Willard present.

The following communication from the Mayor was read:

To the Honorable, the Council of the City of Los Angeles: GENTLEMEN—Your special committee, consisting of Mr. Bred and myself, interviewed Mr. Fillmore, General Superintendent, and W. J. Curtis, General Superintendent of Track of the Southern Pacific Railroad Company, in regard to removal of track from Alameda street. The gentlemen treated us very courteously, and expressed a desire to do everything in their power to promote the interests of this city.

After making known our views and impressing upon them the necessity of removal of track, they made a proposition to us of widening Alameda from First street to the limits to a sufficient width to allow their tracks to be fenced in.

The railroad officials present many difficulties in the way of removal of track, but are willing to take into serious consideration any proposition for a Union Depot on First street. It will require a larger sum of money to accomplish the removal mentioned in Mr. McGary's proposition, yet your committee consider the matter of such importance as to warrant a large expenditure.

The railroad officials desire us to submit a written proposition to them next Saturday, and we ask your Honorable body for further instructions as to what proposition we may make in writing.

W. H. WORKMAN, Mayor.

The Special Committee were requested to interview the Atchison, Topeka and Santa Fe officials about establishing a Union Depot.

Analyzing the Baking Powders.

Under the direction of the New York State Board of Health, eighty-four different kinds of baking powders, embracing all the brands that could be found for sale in the State, were submitted to examination and analysis by Prof. C. F. Chandler, a Member of the State Board and President of the New York City Board of Health, assisted by Prof. Edward G. Dove, the well-known United States Government chemist.

The official report shows that a large number of the powders examined were found to contain alum or lime; many of them to such an extent as to render them seriously objectionable for use in the preparation of human food.

Alum was found in twenty-nine samples. This drug is employed in baking powders to cheapen their cost. The presence of lime is attributed to the impure cream of tartar of commerce used in their manufacture. Such cream of tartar was also analyzed, and found to contain lime and other impurities; in some samples to the extent of 93 per cent. of their entire weight.

All the baking powders of the market, with the single exception of "Royal" (not including the alum and phosphate powders, which were long since discarded as unsafe or inefficient by prudent housekeepers) are made from the impure cream of tartar of commerce, and consequently contain lime to a corresponding extent.

The only baking powder yet found by chemical analysis to be entirely free from lime and absolutely pure is the "Royal." This perfect purity results from the exclusive use of cream of tartar specially refined and prepared by patent processes which totally remove the tartrate of lime and other impurities. The cost of this chemically pure cream of tartar is much greater than any other, and on account of this greater cost is used in no baking powder but the "Royal."

Prof. Love, who made the analysis of baking powders for the New York State Board of Health, as well as for the government, says of the purity and wholesomeness of the "Royal":

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates or any injurious substance." E. G. LOVE, Ph. D.

AGENCY IS COINCEDED.

By persons who, attacked by a mild form of rheumatism, neglect to seek prompt relief. Rheumatism is prevented by an immediate resort to Hostetter's Stomach Bitters. Slight exposure, an occasional draught, will begin this relief, usually, where there is a predisposition to it in the blood. It is not difficult to arrest the trouble at the outset, and well worth the effort to eradicate it when matured. No evidence in relation to this superb blood purifier is more positive than that which establishes its efficacy as a preventive and remedy for rheumatism. Not only is it thorough, but which the venereal and malarial poison, often taken as curatives of the disease, are not. Besides expelling the rheumatic virus from the system, it overcomes fever and ague, biliousness, constipation and dyspepsia.

WILLS PROBATE, December 1, 1885.

Final order for more than three years with disease of the throat and lungs, I got so low that I was entirely unable to do anything, and my cough was so bad I scarcely slept any at night. My Druggist, Mr. H. F. Goodright, sent me a trial bottle of his J. C. AYER'S COLORED AND LIGHT SYRUP. I found relief, and after using six glass bottles, I was entirely cured. J. M.
